

MMX 1000 Series for Drums

▲ Drumming Up Innovation

From our heavy-duty industrial mixers, to our economical drum mixer line, Dynamix utilizes its mixing expertise, no matter the scale.

Unique to the MMX 1000 Series is the Universal Drum Mount (UDM). The UDM improves mixing in closed head drums (2" NPT Bung) and uniquely mounts to open head drums as well. This innovation earns the title "Universal". *(See bottom of page 2)*

Configuration Options

Motors	HP Range: ¼ to 1	▶ Air, electric, variable speed, explosion-proof, and more
Gear Reduction	Direct, 5:1, 10:1, 21:1	▶ Low RPM mixing with substantial torque available
Mounting	2" NPT, Drum Lid, UDM	▶ Multiple mounting options for open and closed head drums
Impellers	Fixed or Collapsible	▶ Collapsible impellers offer increased mixing through 2" opening

THE DYNAMIX SOLUTION ASSURANCE

We provide performance-guaranteed solutions designed for your PRODUCT, PROCESS, and ENVIRONMENT.

At Dynamix, we provide you with a SOLUTION, not just a mixer.

The Difference?

We consider your **Product**, **Process**, and **Environment**.

Our commitment to this is embodied by our **Solution Assurance** – our process guarantee.

Drum Bung Mount: **Closed Head Drum (2" NPT Port)**

Application: Light Viscosity Mixing. This mixer is screw-mounted into a 2" NPT (bung) port and fully encloses the drum. Unique to Dynamix is the 4-bladed collapsible impeller design which was developed to enable greater mixing in closed head drums. This impeller is also used on our Universal Drum Mixer below. Dual and triple impeller options available.

Drum Lid Mount: **Open Head Drum**

Application: Medium to High Viscosity Mixing. This mixer is available with a full range of motor and impeller options configurable to address mixing challenges such as high viscosities, solid suspension, and shear. Dual and triple impeller options available.

Universal Drum Mount: **Open + Closed Head Drums**

The Universal Drum Mount (UDM) was uniquely designed to enable mixing in both closed and open head drums using the same mixer.

UDM on
2" NPT DRUM

UDM is securely clamped on top of drum lid and leads mixer through the 2" NPT opening

Drum rim is straddled and clamped tight against the UDM

UDM on
OPEN HEAD DRUM
